1. Executive Summary

The UNO (Unetwork License Operator) business model is built on a competitive advantage strategy where the operator pays the \$1.99/month subscription fee on behalf of users, providing them with free access to the Unetwork platform. In exchange, earnings are split between the user and operator at competitive rates ranging from 50:50 to 60:40 (user:operator), matching or exceeding the market standard while ensuring operator profitability.

Key Business Fundamentals: - **Total Node Portfolio:** 11 nodes with 2,200 license capacity - **Subscription Model:** Operator pays \$1.99/month per active license - **User Value Proposition:** Free access + better-than-market earnings split - **Earnings Range:** \$4-30/month per license (8 tiers from Poor to Champion) - **Target Earnings:** \$9-25/month per license for sustainable profitability - **Primary Market Focus:** Philippines, Pakistan, India, Nigeria, Kenya, Ghana (multi-country strategy) - **Growth Strategy:** Power user acquisition (20 users x 5 devices vs 100 x 1)

Revenue Formula:

Net Revenue per License = (Average Earnings x Your Split %) – \$1.99 subscription

2. Business Model Overview

Competitive Advantage Structure

YOUR COMPETITIVE ADVANTAGE

WHAT YOU OFFER:

– Users pay: \$0 (completely free)

– You pay: \$1.99/month per active license

– Split: Better than market 50/50

MARKET COMPARISON:

Competitor	User Pays	Split
Open Market	\$1.99/month	50/50
UnityRewards	\$0 (free)	Unknown
YOUR NODE	**\$0 (free)**	**50/50 to 60/40**

YOUR MESSAGING:

"Join completely FREE – we pay your subscription AND you keep more of your earnings than anywhere else."

Business Model Flow

UPDATED BUSINESS MODEL

WHO PAYS WHAT:

- \$1.99/month subscription fee: PAID BY YOU (node operator)
- User earnings: Split between you and user

MARKET COMPARISON:

- Open market rate: 50:50 split (user gets 50%)
- Your competitive advantage: Offer users MORE than 50%
- You cover the subscription = Users get FREE access

REVENUE FORMULA:

Net per License = (Avg Earnings x Your %) – \$1.99 subscription

3. Node Portfolio

Current Node Ownership

YOUR NODE PORTFOLIO

OWNED NODES: 11

LICENSES PER NODE: 200

TOTAL LICENSE CAPACITY: 2,200

Current Focus: UTILIZATION (not acquisition)

Core Assumptions

Parameter	Value	Notes
Total nodes owned	11	Your node allocation
Licenses per node	200	Standard allocation
Total license capacity	2,200	11 nodes x 200 licenses
Monthly subscription	\$1.99	Paid by you (node operator)
Market split rate	50:50	Open market baseline
Competitive splits	50:50 to 60:40	User gets market rate or better
Activation rate	50% (M1) to 80% (M12)	Conservative ramp
Monthly churn	8% (M1) to 4% (M12)	Improves with community
Marketing budget	\$500-\$2,000/month	As allocated
CPA (Cost Per Acquisition)	\$10 (M1) to \$6 (M12)	Efficiency improves

Core Assumptions - Detailed Breakdown

Competitive Splits (50:50 to 60:40)

Our split strategy positions us at or above market rate to attract and retain quality users:

Split	User Gets	Operator Gets	Use Case	Break-even Earnings
50:50	50%	50%	Standard offer (market rate)	\$3.98/mo
52:48	52%	48%	Slightly above market	\$4.15/mo
55:45	55%	45%	Power user incentive	\$4.42/mo

Split	User Gets	Operator Gets	Use Case	Break-even Earnings
60:40	60%	40%	Maximum user retention	\$4.98/mo

Strategy: Start with 50:50 for general users, offer 55:45 or 60:40 to power users (3+ devices) and early adopters to build loyalty and community advocates.

Activation Rate Ramp (50% M1 → 80% M12)

Activation rate = percentage of sign-ups who actually install, configure, and run the app consistently.

Month	Activation Rate	Reasoning
M1-M2	50%	New users, learning curve, some drop-offs
M3-M4	55-60%	Improved onboarding, FAQ refinement
M5-M6	65-70%	Community support kicks in, word-of-mouth quality
M7-M9	72-75%	Referrals bring pre-qualified users
M10-M12	78-80%	Optimized funnel, strong community guidance

Key Drivers for Improvement: - Better onboarding materials and video guides - Active Discord community answering questions - Power users helping new users - Refined targeting attracts more committed users - Reputation builds trust, reducing “tire kickers”

Monthly Churn Rate (8% M1 → 4% M12)

Churn = percentage of active users who stop using the service each month.

Period	Churn Rate	Active Users Lost (per 1,000)	Reasoning
M1-M2	8%	80/month	Early users testing, unrealistic expectations
M3-M4	6-7%	60-70/month	Community engagement reduces drop-off
M5-M6	5-6%	50-60/month	Users see consistent earnings, trust builds
M7-M9	4.5-5%	45-50/month	Strong retention from power users
M10-M12	4%	40/month	Loyal community, passive income habit formed

Churn Reduction Strategies: - Transparent monthly earnings reports - Active community engagement (Discord events, AMAs) - Power user recognition and incentives - Proactive support for users with issues - Regular communication about platform updates

Marketing Budget (\$500-\$2,000/month)

Budget allocation scales with license utilization and proven ROI:

Phase	Budget	Allocation	Target
M1-M3 (Validation)	\$500-800/mo	40% influencers, 30% Meta ads, 20% Google, 10% community	50-150 users
M4-M6 (Growth)	\$800-1,200/mo	35% influencers, 35% Meta ads, 20% Google, 10% Discord tools	150-500 users
M7-M9 (Scale)	\$1,200-1,600/mo	30% influencers, 40% paid ads, 20% retargeting, 10% tools	500-1,200 users
M10-M12 (Optimize)	\$1,600-2,000/mo	25% influencers, 45% paid ads, 20% referral bonuses, 10% tools	1,200-2,000+ users

Budget Principles: - Never spend more than 30% of monthly net revenue on marketing - Scale budget only after proving positive unit economics (LTV > CAC) - Pause and reassess if CPA exceeds \$15 for any channel - Shift budget from underperforming to winning channels monthly

CPA - Cost Per Acquisition (\$10 M1 → \$6 M12)

CPA = total marketing spend ÷ new activated users acquired.

Period	Target CPA	Realistic Range	How to Achieve
M1-M2	\$10-12	\$8-15	Testing channels, expect inefficiency
M3-M4	\$9-10	\$7-12	Identifying winning creatives and audiences
M5-M6	\$8-9	\$6-10	Scaling winners, cutting losers
M7-M9	\$7-8	\$5-9	Referral program contributing 20%+ of sign-ups
M10-M12	\$6-7	\$5-8	Organic + referral = 40%+ of acquisitions

CPA Reduction Levers: 1. **Influencer Optimization:** Double down on creators with <\$8 CPA 2. **Referral Program:** Organic referrals have \$0 direct cost 3. **Community Word-of-Mouth:** Active Discord = free marketing 4. **Retargeting:** Convert warm leads at lower cost 5. **Organic Content:** Evergreen YouTube/TikTok content from influencers

Warning Thresholds: - CPA > \$12: Review targeting and creatives - CPA > \$15: Pause channel, investigate - CPA > \$20: Stop spending, fundamental strategy issue

4. Subscription Model & Split Rate Strategy

Recommended Split Tiers

Tier	Split (User:You)	Who Qualifies	User Gets at \$9/mo	Your Net/License
Standard	50:50	All new users	\$4.50	\$2.51
Power User	55:45	3+ devices	\$4.95	\$2.06
VIP / Early Adopter	60:40	First 100 users OR 5+ devices	\$5.40	\$1.61

Split Selection by Earnings Level

Based on the comprehensive scenario analysis, here are the recommended splits:

If Avg Earnings Are...	Recommended Split	User Gets	Your Year 1 Profit
\$9/month (OK)	50:50 (market rate)	\$4.50	+\$13,732
\$12/month (Good)	50:50	\$6.00	+\$31,571
\$12/month (Good)	55:45	\$6.60	+\$23,435
\$20/month (Very Good)	50:50	\$10.00	+\$79,208
\$20/month (Very Good)	55:45	\$11.00	+\$67,243
\$25/month (Excellent)	55:45	\$13.75	+\$91,148
\$25/month (Excellent)	60:40	\$15.00	+\$79,183
\$30/month (Champion)	60:40	\$18.00	+\$103,088

Understanding Lease Commitments

IMPORTANT: Leases Are Binding

Once a user activates a license, the lease is bound until the end of the period. You cannot change split rates or stop paying the \$1.99 subscription mid-lease.

Implications: - Choose your split rate carefully before launch - New split rates only apply to NEW leases - Existing users keep their original terms until renewal - Plan for worst-case earnings when setting initial splits

Split Rate Decision Framework

SPLIT RATE DECISION TREE

AVAILABLE SPLITS: 50:50 | 52:48 | 55:45 | 60:40

BEFORE LAUNCH: Choose Initial Split

Risk Tolerance: STANDARD

--> Use 50:50 split (market rate, best margqins)

Risk Tolerance: MODERATE (Growth Focus)

--> Use 52:48 or 55:45 split (slightly above market)

Risk Tolerance: HIGH (Max User Value)

--> Use 60:40 split (requires \$5+/mo earnings)

AFTER 90 DAYS: Review & Adjust for NEW Leases

If avg earnings > \$20/mo

--> Offer 55:45 or 60:40 to new users (competitive edge)

If avg earnings \$12-\$20/mo

	--> Offer 50:50 or 55:45 to new users (balanced approach)
+++	If avg earnings \$5-\$12/mo
	--> Keep 50:50 for best margins
AT RENEWAL: Existing Users	
+++	High-value users (good uptime, referrals)
	--> Upgrade to better split as loyalty reward
+++	Standard users
	--> Offer current rate for new users

Monitoring & Adjustment Triggers

Since leases are binding, adjustments happen at these decision points:

Decision Point	What to Review	Possible Actions
Day 30	Early earnings data	Inform split strategy for next cohort
Day 60	First users nearing renewal	Decide renewal terms
Day 90	Solid earnings baseline	Adjust splits for new users only
Each Renewal	Individual user value	Upgrade high-performers

Marketing Your Split Advantage

For 60:40 Split (Maximum User Value): > "Keep 60% of your earnings - 20% more than the market standard. And your subscription? We pay it."

For 55:45 Split: > "Keep 55% of your earnings - 10% more than anywhere else. Zero subscription fees, maximum value."

For 50:50 Split: > "Keep 50% of your earnings - the market standard. And your subscription? We pay it, so you earn from day one."

For Power Users (55:45 or 60:40): > "Run 3+ devices? You're a VIP. Keep up to 60% of earnings + we cover all subscription fees."

Financial Safeguards

Since you cannot exit leases early, build in these protections:

- 1. **Conservative First Cohort:** Start with 50:50 for first 50 users
- 2. **Earnings Validation:** Wait for 30-day earnings data before scaling
- 3. **Tiered Rollout:** Offer 55:45 after confirming \$6+ earnings; only offer 60:40 at \$12+ earnings
- 4. **Power User Priority:** Focus on multi-device users (more revenue per acquisition)
- 5. **Cash Reserve:** Maintain 3-month subscription buffer (\$1.99 x active licenses x 3)

Cash Reserve Calculation

Active Licenses	Monthly Sub Cost	3-Month Reserve Needed
100	\$199	\$597
500	\$995	\$2,985
1,000	\$1,990	\$5,970
2,000	\$3,980	\$11,940

5. Revenue Projections (2,200 Licenses)

Earnings Scenario Tiers

Tier	Monthly Earnings	Description
Poor	\$4/month	Below expectations
Average	\$5/month	Typical low performer
Acceptable	\$6/month	Minimum viable
OK	\$9/month	Solid baseline

Tier	Monthly Earnings	Description
Good	\$12/month	Strong performer
Very Good	\$20/month	High performer
Excellent	\$25/month	Top performer
Champion	\$30/month	Best case scenario

Net Revenue Per License (All Scenarios)

Formula: Net per license = (Earnings x Operator %) - \$1.99 subscription

Split (User:You)	\$4/mo	\$5/mo	\$6/mo	\$9/mo	\$12/mo	\$20/mo	\$25/mo	\$30/mo
50:50	+\$0.01	+\$0.51	+\$1.01	+\$2.51	+\$4.01	+\$8.01	+\$10.51	+\$13.01
52:48	-\$0.07	+\$0.41	+\$0.89	+\$2.33	+\$3.77	+\$7.61	+\$10.01	+\$12.41
55:45	-\$0.19	+\$0.26	+\$0.71	+\$2.06	+\$3.41	+\$7.01	+\$9.26	+\$11.51
60:40	-\$0.39	+\$0.01	+\$0.41	+\$1.61	+\$2.81	+\$6.01	+\$8.01	+\$10.01

Scenario 1: \$4/Month Earnings (Poor)

What Users Get at Each Split

Split	User Gets	You Get	After \$1.99 Sub	Net/License
50:50	\$2.00	\$2.00	-\$1.99	+\$0.01
52:48	\$2.08	\$1.92	-\$1.99	-\$0.07
55:45	\$2.20	\$1.80	-\$1.99	-\$0.19
60:40	\$2.40	\$1.60	-\$1.99	-\$0.39

NOTE: At \$4/month earnings, only 50:50 split is marginally profitable. Higher user splits require higher earnings.

\$4/mo - 50:50 Split Projection

\$4/MONTH EARNINGS – 50:50 SPLIT – 2,200 LICENSE CAPACITY User gets \$2.00 You get \$2.00 You pay \$1.99 sub NET \$0.01 PER LICENSE

6. License Utilization Roadmap

Utilization Plan

LICENSE UTILIZATION PLAN PHASE 1: Foundation (Month 1–6) +-- Target: 850 active licenses (39% utilization) +-- Focus: Prove model, build community +-- Strategy: Single market (Philippines) +-- Budget: \$500–\$1,500/month marketing PHASE 2: Growth (Month 6–12) +-- Target: 2,100 active licenses (95% utilization) +-- Focus: Optimize CPA, increase referrals +-- Strategy: Expand to 2–3 markets +-- Budget: Scale with revenue PHASE 3: Full Capacity + Expansion (Month 12+) +-- Target: 2,200 active (100% utilization) +-- Options: Purchase additional nodes OR partnerships +-- Trigger: Waitlist of 100+ users +-- Investment: \$10,000 per additional node
--

Utilization Milestones

Month	Target Licenses	Utilization	Action
3	380	17%	Validate model
6	850	39%	Expand marketing
9	1,400	64%	Scale winners
12	2,100	95%	Near capacity
12+	2,200	100%	Consider 12th node

7. Target Markets Overview

Primary Markets (Multi-Country Strategy)

Our primary market strategy focuses on six high-potential countries with strong fundamentals for passive income adoption:

1. Philippines (Launch Priority)

- **High English proficiency** - Reduces localization costs
- **Strong freelancer culture** - Users understand passive income concepts
- **Crypto-friendly environment** - Existing crypto/fintech adoption (GCash, Maya)
- **Mobile-first population** - High smartphone penetration, multiple devices common
- **Economic context** - \$5-15/month represents 3-5% of average monthly income
- **OFW Community** - Overseas Filipino Workers seeking extra income

2. Pakistan

- **Large young population** - 220M+ with 60% under 30 years old
- **Growing smartphone adoption** - 100M+ mobile internet users
- **Strong mobile payment ecosystem** - JazzCash, Easypaisa widely used

- **Economic context** - \$5-15/month represents 4-10% of average income
- **High unemployment** - Young population actively seeking income sources
- **English proficiency** - Growing educated middle class

3. India

- **Massive scale potential** - 1.4B population, 800M+ mobile users
- **Crypto adoption** - 93-119M crypto owners despite regulatory uncertainty
- **Tech-savvy workforce** - Strong IT culture, comfortable with apps
- **Economic context** - \$10/month covers mobile data for a month
- **UPI ecosystem** - Instant payment infrastructure
- **Regional language support** - May require Hindi content for broader reach

4. Nigeria

- **Highest crypto adoption** - 32% crypto ownership rate globally
- **Young population** - Median age 18, tech-forward generation
- **Entrepreneurial culture** - Strong “side hustle” mentality
- **Economic context** - \$10/month = week of transportation
- **Mobile money growth** - Increasing fintech adoption
- **English-speaking** - No localization required

5. Kenya

- **M-Pesa pioneer** - Most mobile-money-advanced country in Africa
- **High financial literacy** - Users comfortable with digital money
- **Tech hub** - Growing startup ecosystem (“Silicon Savannah”)
- **Economic context** - \$10/month enables micro-savings
- **English + Swahili** - Basic localization may help
- **Stable internet** - Better connectivity than regional peers

6. Ghana

- **Growing tech adoption** - Increasing smartphone penetration
- **Mobile money leader** - High MTN Mobile Money usage
- **English-speaking** - No localization required
- **Economic context** - \$10/month represents 5-8% of average income
- **Young population** - Median age 21, digital-native generation
- **Stable economy** - Relatively strong in West Africa

Income Context Analysis

Why \$10/month matters in target markets:

Country	Avg Monthly Income	\$10/month =	Context	Priority
Philippines	\$200-350	3-5% of income	2-3 days of food	Primary
Pakistan	\$100-250	4-10% of income	Week of utilities	Primary
India	\$150-400	2.5-7% of income	Covers mobile data for a month	Primary
Nigeria	\$100-300	3-10% of income	Week of transportation	Primary
Kenya	\$150-300	3-7% of income	M-Pesa micro-savings	Primary
Ghana	\$120-280	4-8% of income	Week of data + airtime	Primary
Indonesia	\$200-400	2.5-5% of income	Multiple meals out	Secondary
Bangladesh	\$100-200	5-10% of income	Significant supplement	Secondary
Vietnam	\$200-350	3-5% of income	Week of meals	Secondary

Market Prioritization Matrix

Market	Population	Mobile Users	Crypto Adoption	English	Payment Rails	Overall Score
Philippines	115M	80M	High	High	GCash/Maya	★★★★★

Market	Population	Mobile Users	Crypto Adoption	English	Payment Rails	Overall Score
India	1.4B	800M	Very High	Medium	UPI	★★★★★
Nigeria	220M	100M	Highest	High	Fintech	★★★★★
Pakistan	230M	100M	Growing	Medium	JazzCash	★★★★★
Kenya	55M	35M	High	High	M-Pesa	★★★★★
Ghana	33M	20M	Growing	High	MTN MoMo	★★★★★

Secondary Markets (Phase 2+)

Market	Priority	Key Factors
Indonesia	Medium	270M population, growing crypto adoption
Vietnam	Medium	21% crypto ownership, tech-savvy youth
Bangladesh	Medium	Large population, emerging fintech
Egypt	Low	Large population, regulatory complexity
South Africa	Low	Higher income, smaller total market

8. Power User Strategy

The 20x5 Model

Instead of acquiring 100 single-device users, target **20 power users with 5 devices each**.

Note: Rewards diminish when multiple devices share the same IP address/LAN. Recommend maximum 5 devices per user to maintain optimal earnings per device.

Why 20 x 5 Beats 100 x 1

Metric	100 Users x 1 Device	20 Users x 5 Devices
Total licenses	100	100
Support tickets/month	~50-80	~10-15
Churn risk	High (casual users)	Low (invested users)
Earnings consistency	Variable	Stable (power users optimize)
Community engagement	Low	High (core advocates)
Referral quality	Random	Targeted (know other power users)
Setup support time	100 sessions	20 sessions

Ideal Power User Profile

IDEAL POWER USER PROFILE

CHARACTERISTICS:

Has 3-5+ spare smartphones (old phones, family devices)

Understands passive income / already runs similar apps

Tech-savvy enough to troubleshoot basic issues

Stable internet connection (home WiFi preferred)

Motivated by optimization (will maximize uptime)

Active in online communities (can refer others)

WHERE TO FIND THEM:

r/beermoney, r/passive_income (Reddit)

Honeygain/Pawns.app user communities

Crypto mining hobbyist groups

Tech YouTube commenters

Facebook groups: "Old phone uses", "Phone collection"

Freelancer communities (already multi-device)

Internet cafe / computer shop owners

DISQUALIFIERS:

Response Plan A: Payout Rate Reduction

IF: Unetwork reduces payout rates by >20%

IMMEDIATE (Within 24 hours):

- Draft honest communication for community
- Calculate new earnings projections
- DO NOT hide or downplay the change
- Post in Discord with facts + your continued commitment

SHORT-TERM (Within 1 week):

- Update all marketing materials with new figures
- Pause paid advertising until you assess impact
- Reach out to power users individually
- Monitor churn closely

MEDIUM-TERM (Within 1 month):

- If still profitable: continue with adjusted expectations
- If marginal: reduce your 30% cut to retain users
- If unprofitable: see Exit Strategy
- Consider diversifying to other DePIN projects

Response Plan B: Platform Outage

IMMEDIATE:

- Post status update in Discord within 1 hour
- "Unetwork is experiencing issues. This affects all operators, not just us."
- Link to official Unetwork status/Twitter

DURING OUTAGE:

- Update community every 4-6 hours
- DO NOT speculate about causes
- Reassure users their licenses/earnings are safe

AFTER RESOLUTION:

- Post summary of what happened
- If earnings were lost, explain Unetwork's compensation (if any)
- Thank community for patience

Response Plan C: Competitor Beats Your Terms

IF competitor offers better split (e.g., 70/30 vs your 60/40):

OPTION 1: Match (if economics allow)

- Announce you're matching the better terms
- Frame as "we always want to be competitive"
- Note: You offer splits from 50:50 to 60:40 (user gets 50-60%)

OPTION 2: Differentiate on value (recommended)

- "They offer 80/20, we offer 50:50 to 60:40 PLUS:"
 - Personal support (not just Discord)
 - Fiat withdrawal assistance
 - Power user community
 - Transparent monthly reports
- "The extra 10% = \$0.90/month at \$9 earnings. Our support saves you hours."

OPTION 3: Niche down

- Focus on power users only (competitors won't serve them well)
- Focus on one country (become THE option there)

Response Plan D: Burnout Recovery

WARNING SIGNS:

- Dreading Discord notifications
- Skipping support responses
- Resentment toward users
- Considering quitting entirely

IMMEDIATE ACTIONS:

1. Set Discord to "Do Not Disturb" for 48 hours
2. Post: "Taking a brief break for personal reasons. Back in 2 days."
3. Review what's causing the most stress

STRUCTURAL FIXES:

- Recruit volunteer moderators (power users)
- Raise automation level
- Reduce acquisition pace
- Consider: is this the right business for you?

LAST RESORT:

- Transfer operation to another UNO (partnership)
- Sell your community/list to competitor (with user consent)
- Wind down gracefully (see Exit Strategy)

Response Plan E: Crypto Market Crash

IF crypto drops 50%+ and user earnings feel worthless:

MESSAGING:

- "Yes, crypto is down. But earnings are still accumulating."
- "Users who held through 2022 bear market are glad they did."
- "This is passive income - it compounds over time."

TACTICAL:

- Emphasize bank withdrawal option (fiat)
- Highlight that network rewards are stable (task-based, not price-based)
- Consider: offer to help users convert to stablecoins

Response Plan F: Regulatory Action (Critical)

IF Unetwork faces regulatory shutdown or legal issues:

IMMEDIATE:

- DO NOT make any public statements until you understand the situation
- Consult with legal counsel if available
- Document everything (communications, earnings, user data)

COMMUNICATION:

- Be honest: "Unetwork is facing regulatory challenges. Here's what we know."
- DO NOT promise things you can't control
- Advise users to withdraw earnings if possible

EXIT:

- If Unetwork shuts down, your UNO operation ends
- Help users transition to alternatives if possible
- Pivot Discord community to general DePIN/passive income

Graceful Exit Strategy

If you need to exit the business entirely:

+

+

GRACEFUL EXIT CHECKLIST

+

+

30 DAYS BEFORE EXIT:

+-- Announce to community with honest reason

+-- Stop all paid advertising

```
+-- Stop accepting new users
+-- Identify potential successor (another UNO)

14 DAYS BEFORE EXIT:
+-- Introduce successor to community (if applicable)
+-- Help users understand their options
+-- Ensure all pending withdrawals are processed
+-- Export community data (with consent)

EXIT DAY:
+-- Final message thanking community
+-- Hand over Discord ownership OR archive it
+-- Keep website up with redirect for 90 days
+-- Respond to final questions for 1 week

POST-EXIT:
+-- Write retrospective (what worked, what didn't)
+-- Offer to advise successor
+-- Delete user data per privacy policy
```

Key Performance Indicators (KPIs)

KPI	Month 1	Month 6	Month 12	Target
Active Licenses	125	850	2,100	2,200
License Utilization	6%	39%	95%	95%+
Monthly Churn	8%	6%	4%	<5%
CPA	\$10	\$8	\$5	<\$6
Referral Rate	5%	15%	25%	30%+
Discord Members	150	1,000	2,500	3,000
Support Response	<8hr	<4hr	<2hr	<4hr
NPS Score	20	35	50	40+
